

IAN WARRINGTON

PRESIDENT

During my time as Vice President Student Activities, my positive approach and willingness to try something new has led to the most successful year for sports and societies to date. I have gained many valuable skills and built strong relationships with key stakeholders at the University, putting me in great stead to lead your Students' Union through some of the biggest challenges yet!

I believe that...

- The Campus redevelopments are a significantly positive investment for both the SU and University but it is DSU responsibility to be mindful of students' wants & needs! DSU development is fundamental for future student experience as well as ensuring the changes aren't detrimental to current students.
- DMU offers a range of employment support including placement units. These are brilliant tools for students but are often hidden and need to be publicised more. They also have areas that need development so all students have access to opportunities to improve their employability.
- Further research needs to be undertaken to understand student experience and expectations in the £9k era.

I will...

- Continue building on the work of the current President regarding Personal Tutors and the importance for pastoral care and the overall student experience.
- Campaign for increased funding for sports & societies, media strands and frontline volunteers such as Course Reps and Faculty Reps to improve the overall student experience.
- Improve the way we market the Students' Union, ensuring our services are communicated to students in a more effective way. This would include rebranding DSU in line with the Campus redevelopments.

I'm passionate about DSU and I have shown this throughout my current term in office. I will continue to go the 'extra-mile' to help, support and represent students, leading the Students' Union with creative new ideas!

THE ONLY WAY IS WARRINGTON!!!
