

DEPUTY PRESIDENT EDUCATION

LAURA ROWE

#LEADYOURDSU

demontfortstudents.com/elections

My Aims

1. Having long or short work experience placements available to all students across all courses and Faculties, giving them chance to experience a career in action.
2. Ensuring a wider access to course specific software across campus, so you don't have to wait hours for that 1 specific computer.
3. Better funding for final projects and dissertations. Submitting your best work shouldn't be compromised by not being able to afford printing it.

My Experience

- Worked in a student facing position at the Students' Union, giving me a wide knowledge of how the Union runs and what it has to offer.
- I've had previous successful leadership roles, working with each of my teams to achieve our goals.
- Most importantly, I've been a student. I know what it's like and I want to help improve your experiences in any way I can.

What I would like to achieve

As DP Education, as well as my 3 main aims, I would like to offer employability experiences that will put students ahead in future jobs and

ensuring students know about all the areas that their degree can take them.

I also want to tackle the issue of printing and funding for final projects. These can amount to hundreds of pounds, which is not something that should be coming out of your own pockets, even with printing credits.

It's the small things that make a big difference. One small change would be to have all lecture notes available prior to lectures. I know this frustrates a lot of students who are unaware of lecture content and are unable to prepare. It should be a University policy to ensure that all lecture material is posted on blackboard at least 24 hours before a lecture.

It's your Education, it's your Future!
