

DEPUTY PRESIDENT EDUCATION

MOLLIE FOOTITT

#LEADYOURDSU

demontfortstudents.com/elections

My Aims

- 1) To improve the timetabling system - so they are released earlier, more suitable and manageable for students.
- 2) To strengthen the link between students and lecturers, to help benefit both parties within university life, by giving more responsibility to the Course Representatives for example.
- 3) Implement and improve the mentoring system throughout all courses.

My Experience

I am a second year Course Representative for Psychology, and also the Chair of the Psychology Society. These roles within the uni have helped me manage my time, talk to a variety of different people and also to help implement change in a positive way!

I love meeting new people and feel I am suitable for this role because helping people learn and enjoy their time at university is something I find really important.

The Students' Union is such an important aspect of our university life and I would love to help be a part of improving it even more!

What I would like to achieve

If I were to be elected I would work hard to achieve my top three aims: The mentoring system is something that is not well known and I feel it can have the potential to greatly improve your time at university. By working with all Faculties throughout the university, by building up relationships, it can help open doors you would never think were possible. And obviously, there are always timetabling issues so I would like to try and improve these.

I think education and learning is such a gift. If Elected, I would be able to help develop the Students' Union in a positive way and improve the educational system for all. I'll work hard and hope to make the students proud!

I would also like to represent De Montfort University at a national level by running as a NUS representative.

NUS DELEGATE

I would also like to represent De Montfort University at a national level by running as a NUS representative.
