#MakeEveryVoteVivian

Hi, I am Vivian Nwagboso, studying Biomedical Science. I will be your champion as International Students' Representative in these ways:

1. Continue to push for DMU to offer more financial help so as to ease the huge burden of financial expenses on us or equalise international fees with home students' fee
2. Continue to make international students get specific visa advisor in case your circumstances change during your course of study.
3. Advertisement of the correct duration of courses so as to get the right duration of visa.
4. Bring culturally appropriate teaching, e.g. bring awareness to other methods of teaching from other cultures.
5. Move awareness of regulations affecting international students.
6. Make essay submissions for PhD students and other students online and every other means easier other than travelling from different countries to submit essays in person.

7. Make PhD international students be able to change their supervisors and not be sent back at the word of their supervisors without completing their PhD.

I am the present International Students' Rep and so far I have:

- Successfully presented a policy that all international students should pay same fees as home students which was agreed by DSU's Education Council.
- I have attended NUS conference also pushing forward that international students should pay same fees
- Have successfully helped some international students get specific visa advice due to circumstances they couldn't handle
- ... and I will continue to do more if you vote me in and give me the opportunity to finish what I have started, this is because I am an international student and aware of the problems being faced. I am confident and will make sure that you get every help you require to make your study in DMU a success.

Will you #MakeEveryVoteVivian?
