

Hi my name is Michelle Donawa, a third year Health Studies Student and I would like to become your Women's Representative.

I think that it's important for the university to ensure equal treatment and equal opportunities for everyone studying here. In a time where women are still disadvantaged and underrepresented in many ways, I will aim to:

Empower Women

- Introduce a mentor scheme for mature students to mentor younger students especially the first year students who struggle with transitioning from college to university, or have other issues in general.
- Organise events where successful women can share their life stories and help to empower us as women and inform us on career opportunities.
- Set up a group which will support women in improving and learning new skills such as cooking; or an environment to just relax, socialise and support each other.

- Create an avenue where women can feel safe to discuss situations of discrimination and harassment.
- As a single mother, I understand the difficulties in juggling between being a full time student and full time mom... So I would campaign for the university to set up a child care facility which will assist mothers to overcome the difficulties of attending on time.
- I would like to bring awareness to our young students about the dangers of 'SPIKING' when they go out to have fun, so that their university experience will be a positive one.
- I will ensure that all raised issue are dealt with appropriately and fed back to relevant students.

I want to be your Women's rep because I want Student Union of DMU to be fair and equal and have a platform where Women's voices are heard.

Thank you for your Vote MD
